**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to apparatus for heat sealing a lidding sheet to a base.

Group II, claim(s) 19-26, drawn to method for heat sealing a lidding sheet to a base.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The prior art, EP 0008 870, discloses the limitations of claim 1 such as a press for pressing a lidding sheet onto a sealing surface of a base including flexible face plate and a system for applying pressure to the lidding sheet with the face plate. Therefore, there is lack of unity and no technical feature that defines a contribution over the prior art.
3. A telephone call was made to Mr. Michael D. Kaminiski on March 26, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1791

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
